The lock element (18) ~~is provided with~~ has an engagement portion (23) which, in a locked position, is engaged with a locking geometry (43) of the lock housing (12).

**REMARKS**

By this Preliminary Amendment, a Cross-Reference To Related Applications is being added to the specification, and the Claims and Abstract have been amended to conform with U.S. practice. More particularly, the claims are being amended to avoid multiple dependencies, to delete reference signs, to substitutes “wherein” for “characterized in that”, and to ensure clear antecedent basis. Claims 24-27 are being added to separately claim the preferred feature of original claims 17, 18, 20, and 21, respectively. Claim 14 is being completed in accordance with the teaching of the original specification. The addition of “new matter” has been scrupulously avoided. Claims 1-27 remain in this application.

Favorable consideration of this application, as amended, is respectfully requested.
